Galbrun E, Miettinen P (2012) “From black and white to full color: extending redescription mining outside the boolean world.” *Statistical Analysis and Data Mining* 5(4):284303, DOI 10.1002/sam.11145

The formula for the pessimistic Jaccard (J_P) is erroneous. In Equation (5.7) it is given as

$$J_P(q_A, q_B) = \frac{|E_{1,1}|}{|E_{1,0}| + |E_{0,1}| + |E_{1,1}| + |E_{0,?}| + |E_{?,0}| + |E_{?,?}|}.$$

The correct formula is

$$J_P(q_A, q_B) = \frac{|E_{1,1}|}{|E_{1,0}| + |E_{0,1}| + |E_{1,1}| + |E_{1,?}| + |E_{?,1}| + |E_{0,?}| + |E_{?,0}| + |E_{?,?}|}.$$
